Strategize, Prioritize, Optimize

... KNOW before you trade!

Laser Focus Filters

The information presented within is opinion and should be reviewed and interpreted accordingly. There is a substantial risk of loss in trading. You should carefully consider your financial condition and risk tolerance before implementing new trading strategies.

Increase your chances of a successful portfolio!

Using a fundamental 3 point scoring system to load your list with stocks that are financially strong and ready for trading, these stocks are higher value with a lower price. Picking the strongest stocks is important to maximize returns and with the pre built filters, you will pinpoint the hottest stocks which maximize returns. We could simply pick a basket of stocks and still do reasonably well. But we can do better by picking the best stocks. Lock on for exceptional timing by identifying when the market is setup. Identifying the right timing with setups is important for consistent success in trading. Once our chosen market is setup, keep our risk low and rewards high by firing when the proper signal exists.

Laser Focus combines the strengths of fundamental analysis and technical analysis on multiple time frames to better understand the markets you are trading and gauge direction. This allows you to focus on both the long and short term market directions.

The Laser Focus Library: Gain favorable price setups. Liquidate your positions to lock in optimal profits.
